

**An established global metals trading company is expanding and is seeking two new recruits to complement their existing raw material business.**

### **1st Role**

A trader who can manage existing raw materials portfolio with an emphasis on Base Metal Concentrates. Ability to develop new business opportunities working with the project team which targets long term supply agreements. Will work closely with company's resource lending team offering structured products to the mining and smelting sectors and also develop a raw materials prop trading book.

### **2nd Role**

A technical operations expert within the projects team. The candidate will have experience in concentrates/raw materials in base metals and have a technical knowledge of the products in addition to operational/smelting processes in addition to market knowledge in relation to the placement of such products.

Both roles require extensive travelling, salary and package negotiable and commensurate on experience.
